

Caltrain Weekly Maintenance – June 24 - 29, 2007

Maintenance

Train tracks need frequent maintenance to remain in good order. Caltrain will perform routine maintenance at several locations next week. To avoid train delays the work will take place from 10 p.m. to 7 a.m. There will be some construction noise from equipment used to accomplish the work, but crews will work as quietly as possible. For more information about this work, click [here](#).

South San Francisco, San Bruno

From Sunday to Thursday, a crew will straighten the tracks and replace and compact the ballast under the tracks from Brisbane to San Bruno. Also, a crew will replace cross ties on the tracks near the Oyster Point interchange in South San Francisco.

Weed Abatement

On Monday to Friday Caltrain will use an on-track truck to spray weed killer along the right of way. Weed abatement is necessary to prevent brush fires on and around the train tracks.
